

Chongqing Haifu Medical Technology Co., Ltd.

Founded in **1999**, Chongqing Haifu Medical Technology Co., Ltd. (hereafter referred to as Haifu Medical) is a world leader in Focused Ultrasound Therapeutic Technology. Its innovated Haifu Model JC Series (JC300, JC, JC200) Tumor Therapeutic Systems apply **high intensity focused ultrasound (HIFU)** to treat **solid tumors such as uterine fibroids, adenomyosis, pancreatic cancer and liver tumor**. The Technology has garnered major funding grants and the second prize in both the National Technology Invention Award and the National Science and Technology Progress Award in China.

Bird-view of Haifu Medical Campus in Chongqing, China

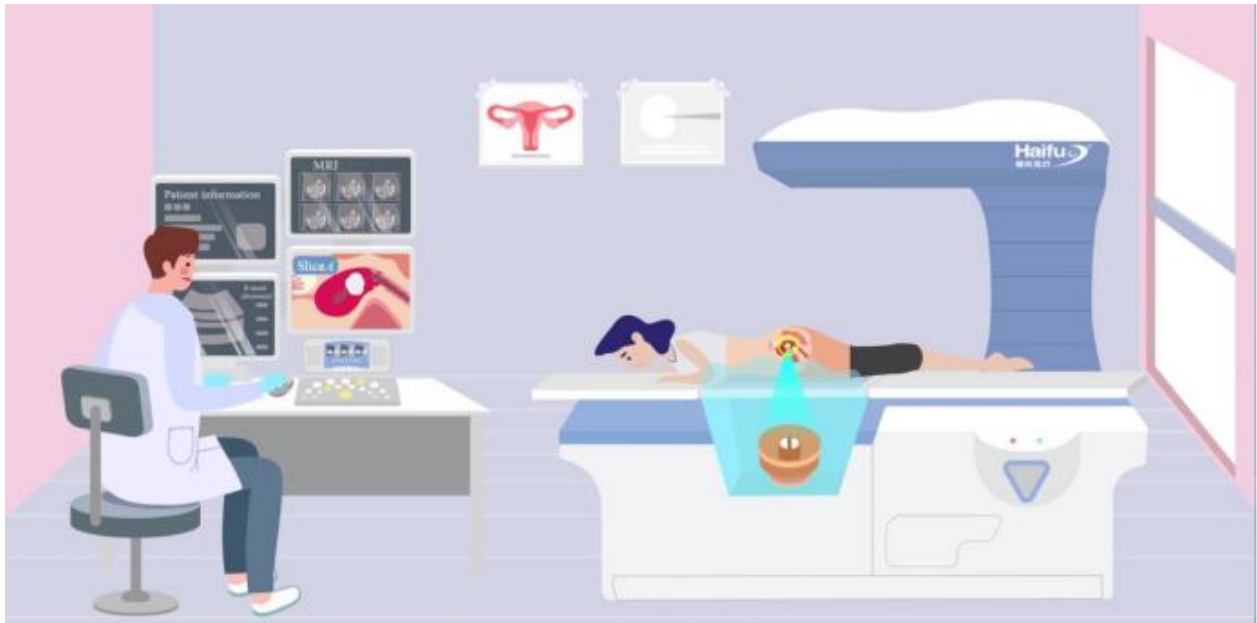

The core value of Haifu Medical is to follow the philosophy of Sir William Osler's ideology **"Diseases that harm require therapies that harm less"** and striving to develop treatment methods that can minimize harm to patients.

Up till 2022, the JC Series of systems have got **approvals in 45 countries and regions** including CE (European Union), KFDA (Korea), NMPA (China), GOSTR (Russia) and are **in clinical use in 30 countries and regions**, covering University Hospitals such as Oxford University (UK), Bonn University (Germany), as well as National Institutes such as N.I. Pirogov National Medical Surgery Center (Russia) and varies Clinics.

Model JC300 Focused Ultrasound Tumor Therapeutic System

Treatment Scenario (Model JC200)

The total number of treated cases has reached **240,000** by the end of Year 2022. To credit the large treatment number, Focused Ultrasound Foundation presented Prof. Zhibiao Wang, the founder of Haifu Medical, the **“Clinical Adoption Award”** in 2022. The award recognizes an individual dedicated to advancing the field of focused ultrasound and whose efforts have led to a significant number of patient treatments.

HIFU Room (Model JC)

By consistent investment in R&D and cooperation with Chongqing Medical University, Haifu Medical has developed a range of focused ultrasound therapeutic devices to treat non-tumor diseases in addition to JC Series, including disease of the vulva and cervix, osteoarthritis, allergic rhinitis, soft tissue injury, etc. By the end of 2022, Haifu Medical has applied 800+ patents and was granted 300+ patents for invention (160 worldwide and 140 domestically).
